# About Us

**Rejoice Scholars** is a professionally managed nodal organization which works to groom the young talents for Olympiads at national and international level. It is a platform where different stakeholders of academic fields have come together with a vision to nurture the talented students and to support them to bring honour for our nation. The students from different schools / institutions join our platform for a healthy competition and to test their analytical and reasoning abilities using their present knowledge base.

**Rejoice Scholars** also aims at developing skills such as lateral thinking and leadership through specialized mentoring and workshops in prestigious institutions under the guidance of academicians of national and international fame.

**Rejoice Scholars** is proud to have a highly dedicated team of renowned academicians for research in content development and academic input.

**TALENT ADOPTION PROGRAMS (TAPS)** is a unique feature of **Rejoice Scholars** where the organization adopts talent at an early stage and provides all financial and logistic support to adopted children with generous support from people, NGOs, societies, and industry.

## Premium Features

The aim of **RMO** is to develop mathematical aptitude in students so that they can excel in their life as mathematics is a universal part of Human Culture. RMO helps parents to analyze the mathematical aptitude of their ward at early stage so that they can plan accordingly.

The aim of **RSO** is to develop scientific temperament and lateral thinking in students at early stage. Science is introduced in our lives at an earlier stage through our education but our curiosity about scientific developments is the key to success.

The aim of **REO** to check and analyze grammatical, vocabulary and literature skills of student at an earlier stage. In today's global environment, the importance of english cannot be ignored as it is the most common language spoken around the world.

The aim of **RCO** is to check and develop aptitude in computers at early stage in students as it is required to get ready not only for future but also for the presentation. Now is the time when we cannot imagine the world without computers.

The aim of **RHO** is to check and analyze the better understanding and appreciation of Indian Culture and values. Hindi is a gateway to a variety of literature, films and other forms of media that can help students gain a better understanding of Indian History & Culture.

The aim of **RR&AO** is to help students become better problem-solvers, better communicator and more successful in their academic and professional life. This skill can help the student to make better decision, solve complex problems and think more critical and creatively.

The aim of **RGSO** is to help student to develop their problem-solving skills, understand their own biases and apply their knowledge in real-world context. It can help students become more well-rounded and informed citizens which is beneficial for a variety of reasons.

## SCORING SYSTEM

Each MCQ question has only one correct answer. For Standard I to X, 4 marks will be awarded for each correct answer and No marks will be awarded for wrong answers.

## REGISTRATION PROCESS

Student applying through schools can contact exam coordinator of the school.

Schools and individual candidates can also apply online through our website by filling the online registration form and paying registration fee.
